

Cutting-edge solutions  
for energy saving

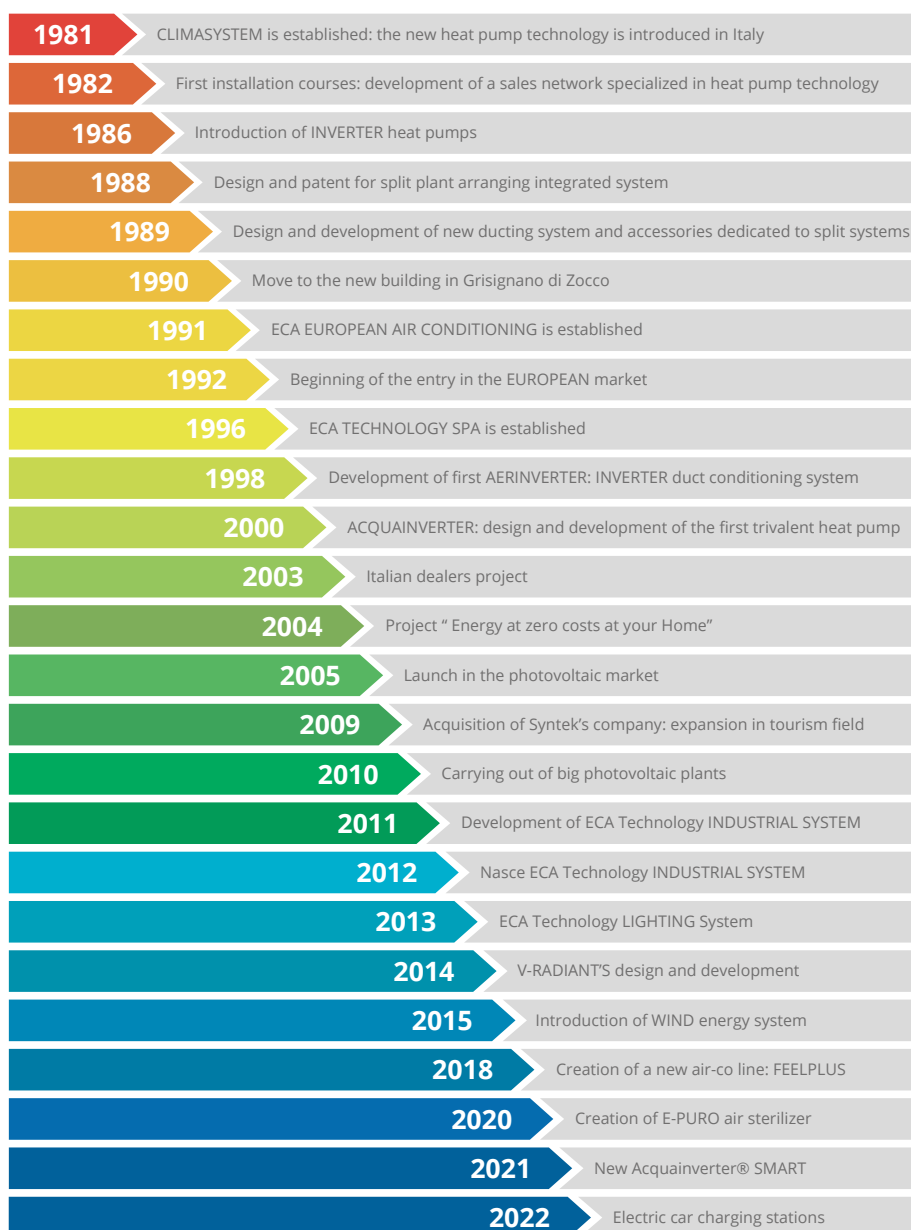

COMPANY PROFILE

# From the first heat pumps in 1981 to the big industrial plants' development

## 40<sup>°</sup> Anniversary 1981 - 2021

### Our history Your safety

With its 40 years of experience, ECA Technology designs and manufactures innovative technologies for the production of electric energy from a renewable source, air conditioning, sanitary hot water and heating offering designers, architects, industrial and private installers, cutting-edge and customized solutions in order to grant a forward-looking conception of construction, attentive to human and environmental needs and capable of meeting the strategic challenge of energy efficiency.

### MISSION

ECA Technology combines the human wellbeing with environmental protection and energy saving.

### VISION

The dream of an independent building with regard to its energy consumption become true thanks to a complete set of technological solutions capable of satisfying private residences, public buildings and production plants.

# Company energy efficiency

## QUALIFIED ADVICE

Industrial Redevelopment and Energy Saving: from energy audits to company cost analysis through innovative solutions that are always at the forefront.

Complete energy efficiency and company long-term cost reduction are achieved thanks to a customized range of essential components.

## DIRECT RELATIONSHIP

ECA Technology supporta il cliente nella scelta delle soluzioni migliori attraverso consulenze e progetti mirati, costante assistenza e, in particolare modo, monitoraggio post vendita, attività imprescindibile per la massimizzazione dei risultati degli impianti.

Photovoltaic and storage system

Electric car charging station

Co-generation and tri-generation

LED lighting

Air conditioning

Air sterilizer

ECA Technology **Operation & Maintenance**, is a service that guarantees the optimization of the performance of your photovoltaic system.

# Home comfort and energy saving

## INNOVATIVE PRODUCTS

The primary objective is to contribute to the construction of homes whose energy needs are fully satisfied by the exploitation of solar energy which, combined with Acquainverter®, a air to water heat pump and innovative air conditioning products, offers maximum comfort and energy savings.

## ADVANCED SOLUTIONS

The complete system for energy saving of private homes, buildings, traditional buildings and in green building.

Thanks to all catalog products, ECA Technology gives life to a customized domestic system that cuts energy costs.
