

Cutting-edge **Solutions**
for **Energy Saving**

**COMPANY
PROFILE**

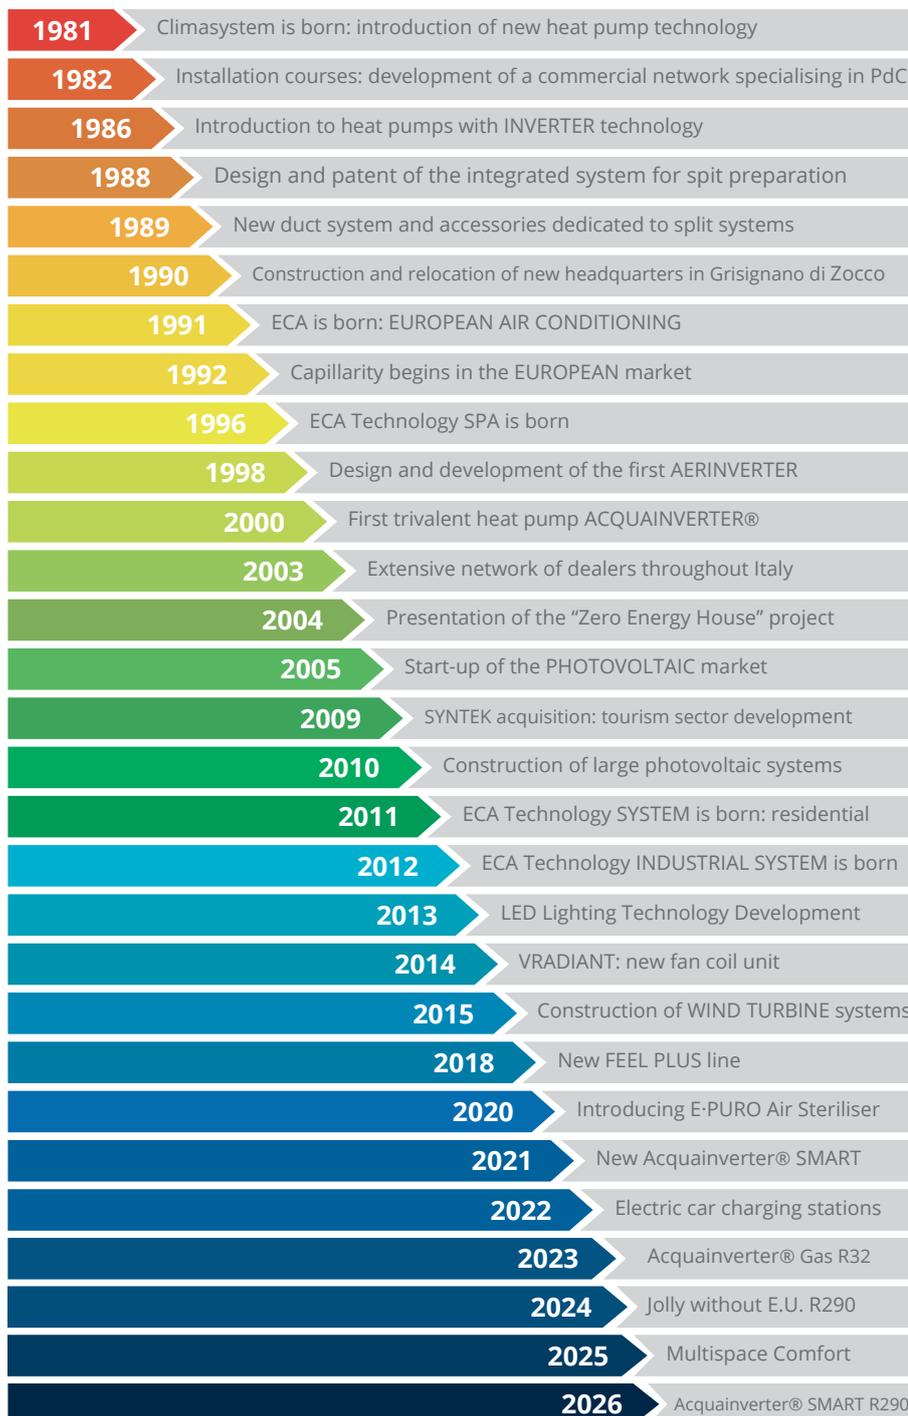

45°
since
1981

YEARS OF INNOVATION

From the first heat pumps in 1981 to the development of large industrial plants

With over 45 years of experience, ECA Technology has designed and developed innovative technologies for the production of electricity from renewable sources, air conditioning, domestic hot water and heating, providing designers, architects, industrial and private installers with innovative and customised solutions for future-oriented construction that is attentive to human and environmental needs and capable of meeting the strategic challenge of energy efficiency.

Our **history** Your **safety**

since 1981

YEARS OF INNOVATION

MISSION

ECA Technology combines human well-being with respect for the environment and energy saving.

VISION

The dream of a building that is self-sufficient in terms of energy requirements becomes a reality thanks to a complete range of technological solutions that can be applied to private homes, public buildings, service sector facilities and production plants.

Energy efficiency in the **company**

QUALIFIED ADVICE

Industrial redevelopment and energy saving: from energy audits to cost analysis in companies through innovative, cutting-edge solutions. Complete energy efficiency and long-term cost reduction in companies are achieved thanks to a customised range of essential components.

DIRECT REPORT

ECA Technology supports customers in choosing the best solutions through targeted consulting and projects, constant assistance and, in particular, after-sales monitoring, which is essential for maximising the results of the systems.

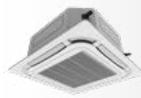

Solar Photovoltaic and Storage Systems

Charging Stations for Cars

Cogeneration and Trigeneration

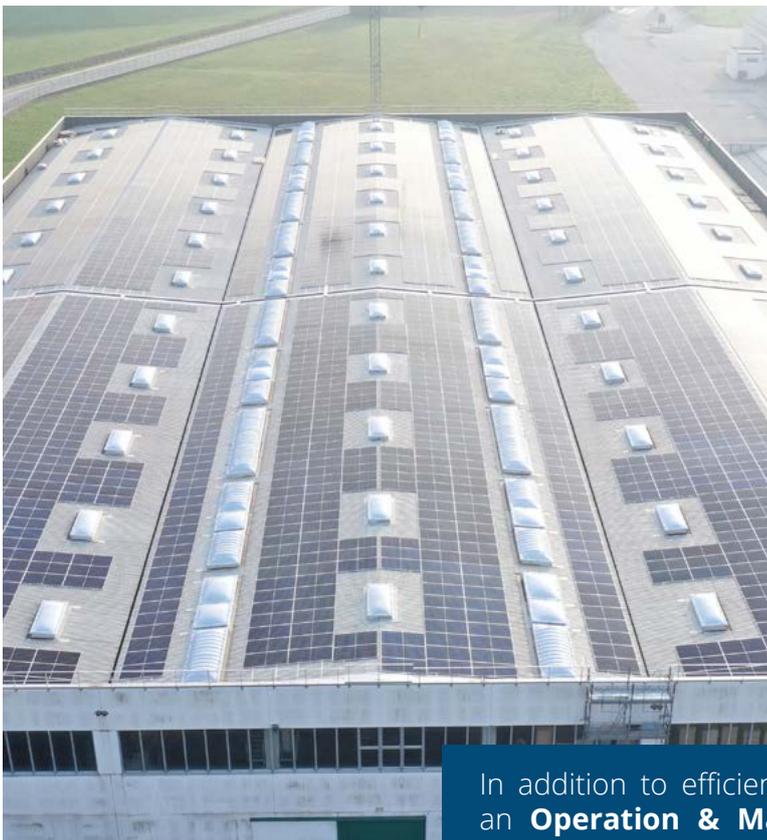

Heat Pumps & Terminals for Air Conditioning

Air Purification Systems

Operations and Maintenance

In addition to efficiency improvements, ECA Technology offers an **Operation & Maintenance** service that guarantees the optimisation of your photovoltaic system's performance.

Home Comfort and energy saving

INNOVATIVE PRODUCTS

The primary objective is to contribute to the construction of homes whose energy needs are entirely met by solar energy, which, combined with Acquainverter®, a trivalent heat pump, and innovative air conditioning products, offers maximum comfort and energy savings.

CUTTING-EDGE SOLUTIONS

The complete energy saving system for private homes, apartment buildings, traditional buildings and green buildings. Thanks to all the products in its catalogue, ECA Technology creates tailor-made domestic systems that cut energy costs.

Solar photovoltaic, batteries & charging stations

ACQUAINVERTER Heat pump

Jolly Comfort Air conditioners without E.U.

Terminals for air conditioning

Solar heating system and domestic hot water boiler

Air purification

ECA Technology's strength lies in its **agencies and over 200 local dealerships**, which extend its reach across the entire Italian market.

Technologies for **tourist facilities**

RELIABILITY

SYNTEK is ECA Technology's line of products that has been present in the tourism sector for over 30 years, offering the best technology for optimal comfort in accommodation facilities.

DIRECT TECHNICAL SUPPORT

ECA Technology designs and manufactures technologies and systems for tourist facilities and prefabricated buildings: Air conditioning, Climacard for energy management, Solar thermal, Photovoltaic, ECA Pool heat pump for swimming pools, LED lighting; products specifically designed for the specific needs of tourism to reduce energy costs and offer maximum comfort on holiday.

Solar Photovoltaic and Storage Systems

Charging Stations for Cars

Air conditioning and heating

CLIMACARD air conditioning management

Solar heating system and domestic hot water boiler

Air purification

Guaranteeing a good product also means ensuring **constant availability** when it comes to after-sales **technical support** in Italy and Europe.

Why choose ECA Technology?

ECA Technology designs and manufactures innovative technologies for the production of **electricity** from **renewable sources**, **air conditioning**, **air purification**, **domestic hot water and heating**, providing innovative and customised solutions for sustainable and future-oriented construction.

Thanks to 45 years of experience, the company has been able to develop a large, reliable and guaranteed sales network that allows it to be present throughout the territory and offer qualified pre- and post-sales services.

Consultancy

qualified and direct relationship with professionals

Products

innovative and reliable, spare parts always available

Support

direct technique

Qualified Network

of Agencies, Dealerships and Technical Centres
